

IN THE SPECIFICATION

Please amend the specification by replacing the paragraph below with the amended paragraph as shown below:

*On page 14 of the Clean Version of the Substitute Specification, please replace paragraph 0037 as follows:*

One method which is prevalent for providing sinus elevation and bone grafting is the Caldwell-Luc Osteotomy. This procedure involves providing an opening or window in the lateral wall of the sinus (FIG. 7) and then elevating the sinus membrane (Schneiderian Membrane) in order to place a bone graft to replace the resorbed bone in the floor and lateral wall of the sinus.
